

## Highlights of Q110

Net sales $\quad$ Net sales EUR 153.9 m (EUR 146.4 m ) $+5.1 \%$ (yoy)
Net sales increased thanks to large number of commissioned assignments resulted by heavy snowfalls.

Operating profit

Operating profit EUR 6.6m (EUR 10.0m); operating profit excluding non-recurring items EUR 7.8m (EUR 11.2m)

Profitability was burdened by a loss of L\&T Recoil, weak profitability of L\&T Biowatti and a credit loss provision in Russia.

EO items: Restructuring costs of EUR 1.2 m arising from production efficiency enhancement measures

## Environmental Services:

## Prices of secondary raw materials recovering

Net sales
EUR 64.6m (EUR 66.9m)
Operating profit
EUR 4.4 m (EUR 6.4m)

Operating profit excl. nonrecurring items

- Net sales in waste management decreased slightly due to lower waste volumes.
- Difficult weather conditions burdened the production efficiency
- Demand and prices of secondary raw materials recovered slowly.
- Profitability of operations outside Finland improved
- Technical problems in L\&T Recoil had a considerable negative effect on the performance of the division.

## Property and Office Support Services:

## Net sales boosted by cold and snowy winter

```
Net sales
EUR 71.5m (EUR 61.1m)
Operating profit EUR 3.8m (EUR 3.4m)
```

Operating profit excl. nonrecurring items

- Increase in net sales and profitability of domestic operations originated from large number of commissioned assignments in property maintenance.
- Net sales of operations abroad remained on a par with previous year. Success in new sales in Sweden.
- Result of operations abroad was negative due to EUR 0.9 m credit loss provision in Russia.

## Renewable Energy Sources: <br> Competitiveness of biofuels still under pressure

```
Net sales
EUR 20.1m (EUR 21.1m)
Operating profit EUR -0.9m (EUR 0.7m)
```

Operating profit excl. nonrecurring items

- Net sales decreased due to lower demand of woodbased biofuels.
- Competitiveness of biofuels weakened due to lower prices of fossil fuels and emission rights.
- Profitability was eroded also by the divestment costs of foreign raw material procurement.

## Preliminary agreement: L\&T to sell its holding in JV L\&T Recoil

- A preliminary agreement, on which L\&T sells its $50 \%$ holding in L\&T Recoil Oy to joint venture partner Ecostream Oy
- The preliminary selling price totals EUR 2.5 million paid in cash and a potential additional selling price of a maximum of EUR 1.0 million, plus slightly under 20\% of EcoStream's share capital
- The arrangement results in a capital gain of around EUR 25 million, cash flow effect to be some EUR 20m positive.
- The arrangement is intended to be completed by the end of June 2010.

## Prospects for the rest of the year

The outlook for the Environmental Services division's waste management services is stable. In the current economic conditions, waste material transport volumes are expected to remain at the present level while rising operating rates in the industry are expected to boost demand for hazardous waste and process cleaning services. In the recycling business, secondary raw material prices are expected to normalise at a moderate pace. Production operations at L\&T Recoil's plant are expected to stabilise at the intended level.

The markets for Property and Office Support Services are expected to remain unchanged. The current economic conditions will presumably increase competitive bidding and reduce orders for additional services.

Demand for wood-based fuels is anticipated to be lower than a year earlier. Furthermore, low prices of emission rights and fossil fuels will undermine the competitiveness of renewable fuels. While planned government support measures to increase the use of renewable fuels will have a positive impact in the long term, it will not affect this year's performance.

Full-year net sales and operating profit excluding non-recurring items are expected to remain at the same level as in 2009.
